

JOIN OUR TEAM

The Support Q Group is an internationally operating service provider for the automotive and supply Industry. Customer oriented service is our strength. Innovative, flexible and future oriented, we devise market-leading concepts and solutions for complex tasks related to every aspect of the production process.

For our projects in Europe we are looking for a team of:

Manufacturing Engineers (f/m)

Your Job:

- Drive new product quality performance and processes in manufacturing, utilizing industry best practices for robustness and failure mode avoidance, including APQP
- Develop PFMEA's, control plans, measurement systems analysis and process capability studies
- Facilitate, coach, and mentor new product development and manufacturing engineering teams
- Instill highest levels of integrity in manufacturability reviews to ensure team collaboration among product groups, component groups, manufacturing groups and suppliers
- Lead process to ensure manufacturing guidelines and best practices are incorporated into designs and manufacturing processes prior to new product launch

Job requirements:

- Engineering degree, in the areas of manufacturing, industrial engineering or product design
- 3 years of experience in Product / Process Validation with extensive application of robustness tools and failure mode avoidance methods
- Previous experience with an automotive OEM or Tier I supplier to automotive OEMs, operating in a mature TS/16949 quality system
- Several years of practical hands - on experience in the APQP / PPAP process, including development (not audit) of PFMEA's, control plans, measurement systems analysis and process capability studies
- Good knowledge of the English language

We are offering the position in a motivated team. The role is demanding with job variation and there is great potential for development.

If you feel you have the skills we are looking for and wish to apply for the position, please send us all relevant documentation via email to Mrs. Jana Wild, jana.wild@supportq.de including your salary requirements, your earliest start date.
